

Budesonide Administration Instructions

Use budesonide, 0.5 mg/mL, 1 respule split between both nostrils twice daily, with the following protocol:

- 1. Draw half of the budesonide respule into a 1mL syringe**
- 2. Place the Mucosal Atomization Device (MAD) nozzle onto the tip of the syringe**
- 3. Irrigate each nostril with half of the syringe pointing the tip of the syringe once placed in the nose towards the same side eye**
- 4. Repeat for other nostril**

Wash MAD device with soap and water and re-use.
