

POST OP LIP LIFT

- Do not drink anything HOT until all sensation returns to lips. When sensation returns, you may eat or drink whatever you desire.
- Apply Vaseline or SkinCeuticals HydraBalm to the suture lines
- You may shower and shampoo, allowing clean water to run across your face the day following surgery.
- You may use cold gel packs
- Take medications as prescribed, No alcohol for at least 24 hours after your operation or if you are taking pain medications, Call the office for increasing pain, redness, and/or swelling. These are possible signs of infection.
- Please call our office (210)468-5426 for nausea and/or vomiting, this may be caused by the antibiotic or pain medications and can be eliminated with other medications
